Economic Overview And Outlook: Nebraska

Jobs

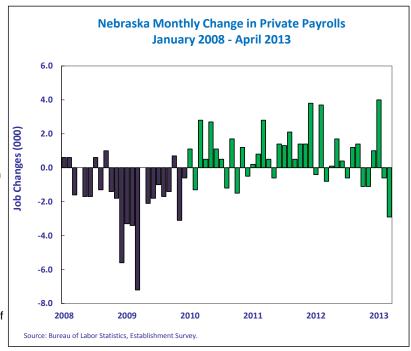

- Including April, the private sector has gained jobs nationwide for 38 consecutive months.
- In Nebraska, private sector employment fell by 4.5 percent from January 2008 to February 2010. Since February 2010, private sector employment has grown by 3.6 percent.
- In Nebraska, employees in the information services, manufacturing, and natural resources, mining, construction sectors faced the largest job losses (as a percent of employment within an industry) over the recession. Since the beginning of 2010, the following sectors in Nebraska have experienced the greatest employment increases: manufacturing; financial activities; and professional and business services.*
- As the economy continues its emergence from the Great Recession, service-providing industries are projected to add the most jobs between 2010 and 2020. The largest gains over this period are expected to occur in the healthcare and social assistance, professional and business services, and retail trade sectors. Job gains in the goods-producing sector of the economy will be led by the construction and mining industries while the number of manufacturing jobs is expected to fall.

EMPLOYMENT

- The unemployment rate in Nebraska was 3.7 percent in April 2013, up 0.7 percentage point from December 2007, but down from its most recent peak of 4.9 percent in February 2010.
- 39,000 residents were counted among the unemployed in Nebraska during April 2013.
- In Nebraska, initial claims for unemployment insurance benefits totaled 7,101 during April, up 5.0 percent from the previous month. Since peaking at 10,941 in June 2009, initial claims for unemployment insurance benefits have declined by 35.1 percent.

EARNINGS

Between the start of the recession in the 4th quarter of 2007 and the 3rd quarter of 2009, inflation-adjusted total personal income in the United States declined 4.6 percent. Most recently, in the 4th quarter of 2012, total personal income is 3.3 percent above its 4th quarter of 2007 level.

Real per capita personal income (in 2005 \$) in Nebraska was \$37,923.60 in the 4th quarter of 2012, up from \$35,885.50 in the 4th quarter of 2010.

Housing

- After peaking in the first quarter of 2007, national home prices declined by 17.6 percent over 21 quarters. Between the second quarter of 2012 and the fourth quarter of 2012, the most recent quarter, national home prices rose by 1.9 percent.
- In Nebraska, home prices fell by 2.7 percent over 8 quarters from their peak in the first quarter of 2008. Since the first quarter of 2010, home prices in Nebraska have risen by 2.7 percent.
- As of the 1st quarter of 2013, 1.1 percent of all mortgages, including 2.9 percent of subprime mortgages, were in foreclosure in Nebraska.
- Housing starts in Nebraska totaled 9,110 units (seasonally adjusted annual rate) in March 2013, an increase of 11.2 percent from February.
- Within the Midwest census region, which includes Nebraska, sales of new single-family homes totaled 51,000 units in March 2013, a decrease of 12.1 percent from February. Sales of existing single-family homes increased 1.9 percent to 1,080,000 units (at seasonally adjusted annual rates) from February to March 2013.

How Does Nebraska Compare To Other States?

Workers across the country were hard hit during the Great Recession. Although labor markets in many states have started recovering, employment in most states still remains below pre-recession levels. The chart below allows you to compare Nebraska to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Nebraska since the start of the recession (shown along the vertical axis) measures the toll the recession took on the job supply in Nebraska.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant are experiencing lower unemployment rates and smaller job losses than the national average.
